WHY CHOOSE THE EXTENDED DAY PROGRAM?

DIVERSE:

Large variety of program offerings including: school work and homework resources, enrichment activities/ clubs, and creative play.

ENGAGING:

Individual/1:1 time between students and teachers to engage and work together.

PARTNERSHIP:

Strong partnership between students, parents and teachers.

COMMUNITY:

Opportunity to engage and create relationships with other families in the BCS community.

DYNAMIC:

Able to quickly and efficiently address student and family needs and provide a program for each student.

The Extended Day program has expanded daily offerings by including "STEAM" (Science, Technology, Engineering, Arts, and Mathematics) career exploration for grades EL3/4-5th grade. This offering includes a weekly activity to learn about careers in the areas of science, technology, engineering, arts or math using the Rozzy Career Adventures curriculum.

Our students explore and discover new interests in a wide variety of topics such as the use of dolphin blubber, art techniques used by artistic masters like Seurat (pointillism) and Picaso (abstracts), to skyscraper design. Each lesson has an individual or collaborative hands-on activity for students to get a feel for how things work. This is just one more opportunity for our students to further discover the talents our God has given them.

The STEAM careers programming is included as part of the monthly enrollment fee for the Extended Day program, and does not require an additional registration and/or fee.

Morning (7:00-7:45)
All Grades, M-F

"This is our 4th year in Brentwood's Extended Day Program. I'm so grateful for how the teachers genuinely love the students. My daughter loves all the craft projects, games, and extra playtime with her friends. It's a blessing to know my child is safe and happy.."

- Rebeca Kale
(2nd Grade Parent)
