

Dear BCS Community,

As you have likely heard on the news, hackers have targeted Zoom and other platforms that schools are utilizing for online learning. Please know that your BCS administration and IT team has been on this for many days and has been working directly with Zoom to secure our portals for class sessions. We have implemented systemic/corporate safeguards as well as safeguards applied by teachers at each individual session. All faculty members are also receiving training this Sunday on new steps to maintain safe and guarded Zoom sessions.

Many parents have reached out to me regarding this issue. Please know that your administration is in constant contact with our platform providers and is constantly monitoring these resources for safety and effectiveness. We have also dedicated 6 staff members to daily QA of all recorded lessons, Zoom sessions, and online communications. Our pledge to you is that the lessons will be provided with a high level of quality and that the resources and platforms are, and will continue to be, vetted and monitored.

***Blessings,
Jay Burcham
President***
